

Create a draft content page within group context

JIRA ticket

 [CFORD-327](#) - Make draft content available to GO/GA/SA RESOLVED

AMP Reference: [CFDRMD-100](#) - Make draft content available to GO/GA/SA *Ready for Review*

Background

Today, users can only see their draft contents when viewing the group homepage. We need to restore the administrator's rights to view all draft contents within a group - as they often need to approve them before publishing. Today the only solution is a direct link, which can get cumbersome... GA/GO + PA/PO + SA should be able to view the total number of draft contents in a specific environment - clicking the total should lead the user to a search query in the environment displaying draft contents

User stories
