JIRA ticket

 [CFORD-273](#) - Follow individual content RESOLVED

AMP Reference: [CFDRMD-71](#) Follow individual Content

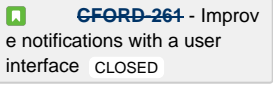

Background

The follow functionality was available in the former platform, ~~and we have migrated data that should be restored.~~ Follow projects is already developed, so this is just a matter of allowing follow contents. We decided not to add follow groups in the end since users can easily join the group - also when the group permissions are updated, the owner is not aware who is following their group, so it could create issues when changing the permissions from bottom up. It makes more sense to use the membership to subscribe here.

The below user stories are also linked to the notification that is sent for content followers - described as **US-2** under [Follow individual content](#) (as a **user**, I want to receive **notifications for contents I follow**, so that I can **keep informed**).

User stories

User story	AC	Comments
------------	----	----------

US-1	As a user , I want to follow a content , so I can remain informed	<ul style="list-style-type: none"> user can subscribe to content follow notifications by clicking 'follow' on the detailed page of the following contents: <ul style="list-style-type: none"> Articles (Voices&Views), Help page, Content page inside Groups: Wiki page, Discussion, Document, Event, Photo Album inside Projects: Wiki page, News, Document, Event, Photo Album User can unsubscribe from content follow notifications: <ul style="list-style-type: none"> on the detail page of the content - click unfollow in the user's notification settings (see ) from the notification itself when user unsubscribes from content follow, remove the subscription from his/her settings + update the link on the detailed page to follow By following a content, user receives a notification e-mail when: <ul style="list-style-type: none"> followed content is added /edited AND 'send notification' is checked comment is published/edited on that content AND 'send notification' is checked user can update notification interval in the settings page 	Help + Global pages removed - See comments in Follow individual content
	As a user , I want to receive notifications for Groups I follow , so that I can keep informed	<ul style="list-style-type: none"> User can subscribe / unsubscribe Group follow notifications <ul style="list-style-type: none"> from the Group homepage from Account settings Users following a Group receive an e-mail notification when the following content types are created / updated AND the author /editor checks the box to 'Send Notification' <ul style="list-style-type: none"> Wiki, Document, Discussion, Event, and Comments 	no group follow, only group membership

Business needs

Business Need		AC	Comments
BN-1	As capacity4dev , we want to add content follow , so users can remain informed	<ul style="list-style-type: none"> Add follow link to the following content pages: (preview below) <ul style="list-style-type: none"> Articles (Voices&Views), help page, content page inside Groups: Wiki page, Discussion, Document, Event, Photo Album inside Projects: Wiki page, News, Document, Event, Photo Album Default interval: Part of different story 	Help + Global pages removed - See comments in Follow individual content

BN-2	As capacity4dev , we want to edit the group export , to update titles and values	<ul style="list-style-type: none"> Update the title of column 'Group follows' to 'Group Notification Subscriptions' <ul style="list-style-type: none"> in the global group export in the group statistics export for GO/GA All content follows in the group export should be reset to zero value (BN-4) All group follows that are not active members of the group (if any) should be removed (BN-4) 	
BN-3	As capacity4dev , we want to edit the project export , to update titles and values	<ul style="list-style-type: none"> All content follows in the project export should be reset to zero value (BN-4) 	
BN-4	As capacity4dev , we want to delete existing content follows on capacity4dev, to clean migrated data	<ul style="list-style-type: none"> delete all migrated data for content follows from the platform delete all migrated data for group followers that are not active members of the group 	
	As capacity4dev , we want to add group follow , so users can remain informed	<ul style="list-style-type: none"> update group follows with the migrated data from Drupal 6 when user follows a group, user receives a notification e-mail when the following contents are published (created/edited) AND 'send notification' is checked: <ul style="list-style-type: none"> Discussion Document Event Photo Album Wiki page No notification is received when <ul style="list-style-type: none"> changes in memberships (new member, removed) new comment new recommendation content deleted 	let's begin with content follow and apply it to project contents and v&v's

- The user can subscribe/unsubscribe to content follow notifications on the detailed page (views below are from an admin (GO/GA or PO /PA or SA)):
