Business needs

Business Need		AC	Comments
BN-1	As capacity4dev , we want any static export to be readable , and available as Excel & CSV	<ul style="list-style-type: none"> Statistic report should be made available as a CSV and as an Excel file Both formats should translate all Unicode characters into readable text - including special characters Dates and time should be written with the following format: dd/mm/yyyy + hh/mm This concerns both groups, projects, members as well as contents 	start with .csv then explore excel later
BN-2	As capacity4dev , we want to add a custom date selector for all statistic reports	<ul style="list-style-type: none"> A start and end date range can be selected from a Date selector This concerns both groups, projects, members and contents 	
BN-3	As capacity4dev , we want to export the group member report , so that the user traffic within the group can be analyzed per group	<p>The Group Member export includes the following information in a readable format:</p> <ul style="list-style-type: none"> First Name Last Name Total content posted Total comments posted Invited by Group Member since Membership status (Active, Pending, Blocked) Member role Date + Time of Last login on C4D Date + Time of Last activity within the Group Organisation Name Organisation Type Country 	
BN-4	As capacity4dev , we want to export statistics on the group contents , so that the group progress is analysed	<p>The group statistics on contents can be exported with the following details:</p> <ul style="list-style-type: none"> The content title The content type Author The Number of views The Number of recommendations The Number of comments The Number of downloads where applicable (documents) The Number of shares (outward) 	

BN-5	As capacity4dev , we want to export statistics on the project contents , so that the project progress is analysed	<p>The project statistics on contents can be exported with the following details:</p> <ul style="list-style-type: none"> • The content title • The content type • author • The Number of views • The Number of recommendations • The Number of comments • The Number of downloads where applicable (documents) • The Number of shares (outward) 	
BN-6	As capacity4dev , we want GO/GA to download the aggregated report on the group/project, so that they can have a better overview on the group/project progress	<p>The group aggregated report can be exported with the following details:</p> <ul style="list-style-type: none"> • Discussions • Documents • Events • Media • Wiki page • Comments • Members <p>This applies to projects as well</p>	low priority since they have this information from the member and content exports
BN-7	As capacity4dev , we want to add a custom date selector before exporting data from groups , so that exports are based on a given date range	<ul style="list-style-type: none"> • The start and end date format is selected in the following format: dd/mm/yyyy – dd/mm/yyyy from the Date Selector • Exports are generated for: today, yesterday, last 7 days, last 30 days, this months • Two calendars shows up, one (left-side) for the start date and the other (right-side) for the end date that the export should be generated for • GO/GA can see the selected date range after specifying the start and end date from the date selector with the proper date format • GO/GA can export the group statistics for a specified period of time in the readable format
