

Prevent duplicate form actions

JIRA ticket

GFORD-249 - Prevent duplicate form actions RESOLVED

AMP Reference: [CFDRMD-51](#) Prevent Duplicate form actions *Ready for Review*

Since the launch in March 2017, we've encountered many issues with duplicate contents – with the site responding slowly, users are clicking the save button more than once, which creates a number of duplication of the same content (the duplicates however don't have taxonomies) – this has caused confusion, upset users and impacted the DB and stats. We need to prevent the save button from doing more than a single action to avoid these issues.

Business Needs

Business Need		AC	Comments
BN-1	As capacity4dev , we want to prevent identical duplicate actions , so that contents are only created once	<ul style="list-style-type: none">• Prevent duplicate creation/update of contents when user clicks SAVE multiple times• Prevent duplicate creation/update of contents when user clicks SAVE AS DRAFT multiple times• If missing mandatory fields, keep SAVE and SAVE as DRAFT disabled• Both the SAVE and SAVE AS DRAFT should disable after being clicked• These actions should cover all content types for all users (from user to site admin)
