

Print functionality

JIRA ticket

 [CFORD-246](#) - Implement a print functionality CLOSED

AMP reference: [CFDRMD-57](#) Implement a print functionality *Ready for Acceptance*

Background

We used to have a print function for all contents, including a specific print function for books that would allow downloading one page, a page and all its children, or the entire book – the book preview in particular allowed for the viewing online of media and embedded content so that visitors could read the entire book without having to navigate between pages.

User stories

user story		AC	Comments
US-1	As a visitor , I want to print a specific page on capacity4dev, so that I can print/save a copy	<ul style="list-style-type: none">• Visitor can click the <u>print</u> button – action opens print preview• Visitor can select print everything as a setting in the print preview (BN-2)• Visitor can select print text only as a setting in the print preview (BN-3)	if the only option is to provide 2 links for text only vs normal, forget it
US-2	As a visitor , I want to print a book section on capacity4dev, so that I can print/save a copy	<ul style="list-style-type: none">• Visitor can click <u>print this page and its sub-pages</u> – action opens print preview• Visitor can select print everything as a setting in the print preview (BN-2)• Visitor can select print text only as a setting in the print preview (BN-3)	
US-3	As a visitor , I want to print a book on capacity4dev, so that I can print /save a copy	<ul style="list-style-type: none">• Visitor can click <u>print all pages and sub-pages</u> – action opens print preview• Visitor can select print everything as a setting in the print preview (BN-2)• Visitor can select print text only as a setting in the print preview (BN-3)	

Business needs

BN-1	As capacity4dev , we want to include a print function , so users can save/print contents	<ul style="list-style-type: none"> • Enable print function on the following detailed pages: <p>GLOBAL</p> <ul style="list-style-type: none"> • article (V&V) • help page(s) • content page <p>inside Groups/projects</p> <ul style="list-style-type: none"> • document • discussion • news • event • photo's • photo albums • book page(s) 	<p>print for contents should appear under do more</p> <p>print for books should appear on top right of the page with expand on click to display the 3 options</p>
BN-2	As capacity4dev , we want to define ' print everything ' setting	<ul style="list-style-type: none"> • For detailed contents, include (in order): <ol style="list-style-type: none"> 1. title, banner/image, body (exclude any administration tabs on contents) 2. comments (if any) 3. basic metadata: <ol style="list-style-type: none"> 1. included: action, author, date of posting + taxonomies & tagging 2. NOT included: block 'Do more through capacity4dev' + block 'Share this page' 4. full URL of the page (exclude navigation, cookie consent, header, footer...) • For book contents, also include the hierarchy in breadcrumb format (the body of a wiki page should display in full without the side navigation as displayed online). 	<p>add preview for full book print</p> <p>Full URL is an option in the printer dialog of browsers.</p>

BN-3	As capacity4dev , we want to define 'print text only' setting	<ul style="list-style-type: none"> For detailed contents, include (in order): <ol style="list-style-type: none"> title body, excluding images and media frames comments (if any), excluding the avatar image for users basic metadata <ol style="list-style-type: none"> included: action, author, date of posting + taxonomies & tagging NOT included: block 'Do more through capacity4dev' + block 'Share this page' full URL of the page (exclude navigation, cookie consent, header, footer...) For book contents, also include the hierarchy in breadcrumb format (the body of a wiki page should display in full without the side navigation as displayed online). 	<p>maybe remove</p> <p>Full URL is an option in the printer dialog of browsers.</p>
BN-4	As capacity4dev , we want hyperlinks to be clickable and lead the user to capacity4dev	<ul style="list-style-type: none"> Hyperlinks are clickable and redirect users to capacity4dev 	Depends on the PDF printer used.

Resources for Group owners and Administrators

As the owner or administrator of a Group, there are a number of things that you can do to help manage your community.

Print options

Print
Print page & sub-pages
Print all pages & sub-pages

Manage your Group

- Group Details
- Group permissions
- Define related Groups and/or Projects/Programmes
- Create custom Group Categories (custom tagging)
- Enable/Disable Group Features

Contribute content

- Create Wiki pages / rearrange wiki pages
- Start a Discussion
- Upload a Document
- Attach a Document (to another content)
- Upload a Photo
- Create a Photo Album
- Add an event to the Calendar

Manage Content

- Highlight content
- Promote Content
- Edit another member's content
- Update authoring information
- Grant permissions to edit Wiki pages

Interact with other Members' Posts

- Respond by adding a Comment
- Recommend
- Share to Social Media
- Share content across Groups

What is Joint Programming?

Page created by Andy Benfield | 19 January 2014

1 2 204

What does Joint Programming mean?

- The establishment of a **single EU country analysis and response strategy** for a partner country. The strategy must provide the overall rationale and direction for aid provided by the EC and EU MS as well as saying which European donor will work in which sector and their indicative funding allocation to it. Apart from that, there is no template, so the document can be developed according to the specific requirements of each country.
- The joint strategy should be developed **instead** of bilateral strategies and not in addition to them.
- The strategy should limit itself to saying which sectors each donor will work in. It should **not go into the details of how this work will be carried out**, i.e. aid modalities or individual initiatives to be pursued. These questions should instead be left to each donor's bilateral implementation plan (in the EU institutions case, the NIP), to be developed as they see fit. Each donor is therefore still free to pursue the aid modalities they choose and to undertake either bilateral or joint initiatives.
- The strategy, and individual donor bilateral implementation plans, should be **aligned to the calendar of the national development plan**.

What are the benefits?

- Less gaps and overlaps, better value for money, all can claim credit for the impact of the whole strategy, opportunity for more joint initiatives on the ground, more influence vis-à-vis Government and other players, and lower transaction costs for Government. Overall, **higher impact aid and more EU influence**.

What have we promised to do?

- October 2010** - Letter from EU DGs to all Ambassadors - commits to take forward joint programming.

Print options for the following content types:

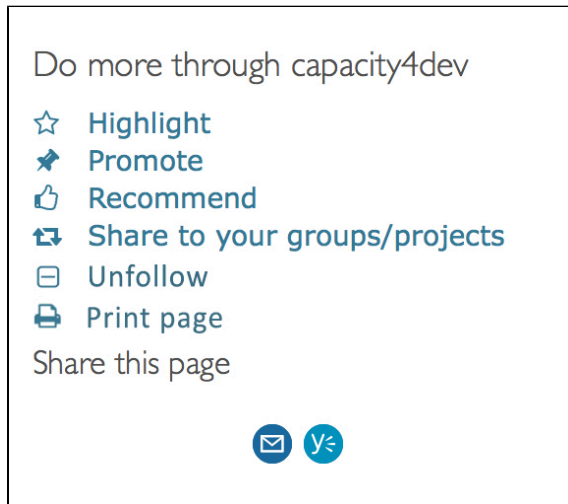

Global:

- article (V&V)
- content page

Inside Groups/projects

- document
- discussion
- news
- event
- photo's
- photo albums

The above content types are single page content pages: A print link is added under the 'Do more through capacity4dev' as follow:

Example of a print section (page and sub-pages):

The header is the name of the group with the visibility - and should appear on all print pages

The footer corresponds to the url of the last sub-page + the page number of the printed selection - and should appear on all print pages

Policy Forum on Development (PFD) PUBLIC

[Policy Forum on Development \(PFD\)](#) > [Consultations](#)

Consultations

The PFD members are regularly consulted on EU strategy and thematic programmes. This section presents the different consultations held since the creation of the PFD.

[Policy Forum on Development \(PFD\)](#) > [Consultations](#) > [CSO-LA Strategy 2014-2020 Consultation](#)

CSO-LA Strategy 2014-2020 Consultation

In October 2012, the PFD members were consulted on the proposed Strategy for the Thematic Programme on CSO and LA covering the period 2014-2020.

The documents available under this page relate to: the overall approach of the Thematic Programme (Concept note); the introduction of the different components and the comments provided by the Members for each component of the programme.

Video transcript: "Interaction LA CSO Leonardo Romeo"

Comments

[Emilie Van der Henst](#) | 8 November 2012

ØThere is a strong focus on inclusive economic growth. The promotion of inclusive economic growth should not be environmentally harmful and the Commission should ensure environment is mainstreamed in its development programmes, including in the CSO programme. We believe that the term "sustainable development" is a more appropriate objective. Poverty eradication cannot be achieved only via economic growth but because of the multidimensional aspects of poverty, the EU should consider other types of indicators such as empowerment, respect of human rights, access to resources, voice and participation etc.

ØDifferentiation should not be applied to thematic programmes. During the last Policy Forum in May the EC clearly stipulated that the thematic programmes would be available for the Middle Income Countries as well. The EU delegations in the Middle Income countries should continue to have the necessary capacity and human resources to handle the management of projects funded under the thematic programmes.

ØThe CSO programme should recognize the specificity and added-value of family organisations for

their global coverage, their effectiveness, their roles in convening multistakeholder alliances, , their experience and ability to make local, regional and global connections to address drivers of global problems

ØThe CSO programme should recognise and promote the important contribution of EU CSOs in holding the EU to account, in the same way as the EU wishes to support civil society actors in other parts of the world to hold their governments to account.

ØIf the EU decides to remove the multi-country envelope promoting cross-border multistakeholder partnerships, then they should ensure that the Global Public Goods programme will include such approaches in order to fill the gap. We believe that multi-stakeholder partnerships are highly important to achieve development objectives. Triggering dynamic and innovative partnerships to work on complex integrated issues. The EC should encourage and support the creation of such partnerships.

Lucie Guillet | 12 November 2012

PLATFORMA COMMENTS

A **consultation process** is underway for local and regional governments, which outcomes expected for December 2012 should impact the programme's strategy. Therefore, we would like the detailed timeline for the strategy's approval to be clarified.

Diane Kelecom I don't understand what you mean with "footer corresponds to the url of the last subpage". Printing page numbers is, in theory, possible in CSS, but browser support is a bit lacking.

Every browser seems to have both functions already built-in though, so is there a specific reason you want to add this to the page content itself rather than giving this flexibility to the user?
