BN-1	As <b>capacity4dev</b> , we would like to <b>update the manage group page</b>	<ul style="list-style-type: none"><li>Delete link to archive group</li><li>Delete the mention "X Group membership requests waiting for approval."</li><li>Add title Group Membership</li><li>add link to manage all group memberships</li></ul>	<p>the archive link remains identical throughout the life cycle of the group and has no real need here - please remove it</p> <p>Please also delete the mention of group membership requests which in fact corresponds to pending invites - and directs the user to an empty member overview page</p> <p>today the user needs to understand clicking through 'invite a member' brings you to the link 'manage all memberships' - this is not intuitive, adding it under manage group makes more sense</p>
BN-2	As <b>capacity4dev</b> , I want to <b>update manage all group memberships</b>	<ul style="list-style-type: none"><li>Add manage all group memberships as the first tab (tab 1)</li><li>update the title invite group members to invite members (tab 2)</li></ul>	<p><u>For later:</u> in addition to these minor edits, we want to combine the invitations tab directly into the manage all group memberships page. we would then add a group status (invited) and include these invited visitors and members here - with a resend invite link (to avoid having to delete an existing invite to re-invite someone) TBD</p>
